Storage space is in short supply

You want to expand your station or warehouse space quickly and are faced with the following challenges?

-  **You don't know exactly how long you need additional space.**
Likely a few months, but perhaps even a few years.
-  **You want to keep the size of the added space flexible.**
Depending on how things develop, the storage space should be expandable or reducible at short notice.
-  **You need a tailor-made building concept.**
Specific temperature ranges or lighting intensities in the building for example, or insulated and fully automated high-speed doors – and you want everything from one reliable partner.
-  **You want a building space that can be flexibly relocated.**
You intend to use your building at a different location in future. Or you only need the building during a refurb and rebuild project.
-  **You are looking for a flexible financing model that matches your own particular liquidity plans -**
one that makes it feasible to immediately purchase the semi-permanent building, lease it or even buy it after a hire period.

A reliable and proven system

References and examples of our semi-permanent building solutions

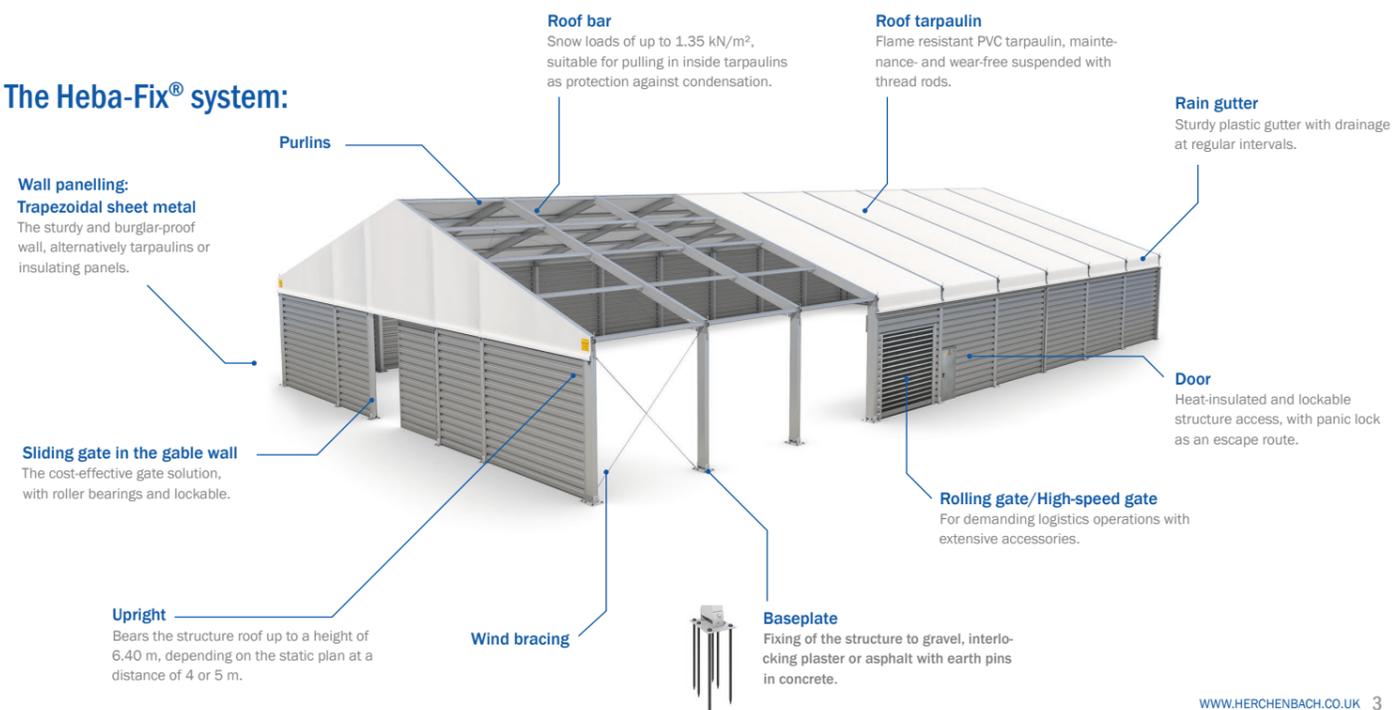

1 High-grade industrial pvc-tarpaulin tent as wind & weather shelter with tarpaulin gate as a cost-efficient warehouse or vehicle garage. **2** Multi-bay temporary warehouse with a loading bay canopy and open gable walls. **3** Sectional roller doors in a vehicle building with multiple bays adjacent and connected. **4** Semi-permanent storage building for fire trucks during refurbishment activities of the main fire depot on composite paving. **5** Inside view of a durable multi-purpose temporary building. Hire and purchase available.

Your solution! 6 good reasons for a Heba-Fix® temporary building from Herchenbach:

- 1** Our temporary buildings can be delivered in two weeks. 1,000 m² space can be ready for use in less than a week.
- 2** Our Heba-Fix® semi-permanent buildings can be set up, taken down or moved to a different location in just a couple of days. Often we don't need a separate foundation or groundworks saving you time and money.
- 3** You can buy, lease or hire our Heba-Fix® buildings. Our hire contracts are completely flexible, giving you the option to hire a temporary building for a few months and decide on an extension or purchase later on.
- 4** As the industry's trusted provider for a range of semi-permanent building solutions, each solution is customised. No matter how specific your request, we will find the optimal solution. Our knowledge and experience gained from over 2,000 building projects allows us to anticipate the needs of specific industries, enterprises and products.
- 5** We offer the complete package: whether you need 500 LUX LED lighting, heating, air conditioning systems or impact blockers – we supply everything.
- 6** Our modular Heba-Fix® building system can be expanded or reduced at any point. Wall systems can simply be replaced to transform an unheated building into a heatable, insulated one in no time.

The Heba-Fix® system:

We even have solutions for particularly demanding situations:

Munich International Airport, Fire Depot North, Vehicle Building 510 m²

Installation of an insulated temporary building on asphalt within the security perimeter of the airport. Use as vehicle building in conjunction with already existing building. Includes 4 roller gates, lighting, wall sealing and other specs for optimal use. Installation duration: 1 week. 100% conform with all building regulations (DIN EN 1991) for permanent installation. Customer hired building at first, but then decided to purchase after 12 months of hiring.

Highlights

Installation on asphalt without groundworks

4 rolling gates

Fully insulated walls & roof

Lighting & wall-sealing

ADAC Air Rescue Helicopter Hangar

Our customer was looking for a 1,200 m² insulated temporary building with a large roller gate in the gable wall, for use as a hangar for an aircraft. Herchenbach's engineers developed a customized solution with a 18.50 m wide gate and the building was installed within two weeks.

Highlights

Exposed site with high winds

18.50m extra wide rolling gate

8 days installation

Planned use: 20+ years

Hire with Herchenbach – The clever alternative:

- › Flexible planning & duration: time and space for your core business
- › Immediately tax-relevant & liquidity protecting: capital and resources for your core business
- › Attractive terms & quick delivery: installation in 2-3 weeks
